Plurals : The Nominative Plural

526. Plurals are of two kinds, (i) those formed by inflexion of the radical, and (ii) those formed by the addition of a plural suffix. A large part of the nouns in Class I, A, form their plural (i.e. ndp.) by palatalization of the final consonant of the stem,

e.g. **kat**, pl. **kat'** ; **f'ar**, pl. **f'ir'**. The few nouns that belong to Class III, D, form their pl. by adding **-in'** to the sg. form, thus : **ʟax(ə)**, pl. **ʟaxin'**.

527. There is a small group of nouns ending in **-ə** *-e* in the sg. which form the pl. by substituting **-u:** *-eadha*[1] for **-ə** *-e*. The gen. pl. also of these ends in **-u:** *-eadh*.

Examples—**kl'et'ə** *cleite*, pl. **kl'et'u:** ; **fahn'ə** *faithne*, pl. **fahn'u:** ; **g'a:r(ə)xal'ə**, *gearr-chaile*, pl. **g'a:r(ə)'xal'u:** ; **glan'ə** *gloine*, pl. **glan'u:** ; **ʟ'ehə** *leithe*, pl. **ʟ'ehu:** ; **rehə** *reithe*, pl. **rehu:** ; **ʃehə** *seithe*, pl. **ʃehu:** ; **ʃin'ə** *sine*, pl. **ʃin'u:**.

528. Nouns in Class I, B, C, and D (i), as also nouns in Class IV, A (i), and most in Class IV, B (i), end in **-i:** in the pl. In all these **-i:** as pl. ending is invariable, that is to say it is never replaced by **-ə** in any circumstance.

529. In the case of nouns in Class II, A, and C, the pl. is regularly formed by adding the vowel **-ə** to the final consonant of the sg., but only when an attributive adjective or defining gen. (with consonant initial) follows in close sequence. Where no such adjective or defining gen. follows in close conjunction, the plural of the noun is formed by adding **-i:**, not **-ə**. In illustration of this important point the following examples may be cited :

(a)	Sg. (i) **ə v'ẽ:r** *an mhéar*	(ii) **ə v'ẽ:r v'eg** *an mhéar bheag*
	Pl. (i) **ɴə m'e:ri:**	(ii) **ɴə m'e:rə b'egə**
(b)	Sg. (i) **ə xaʟ'əx** *an chailleach*	(ii) **ə xaʟ'əx ɣuf** *an chailleach dhubh*
	Pl. (i) **ɴə kaʟ'əxi:**	(ii) **ɴə kaʟ'əxə duwə**
(c)	Sg. (i) **k'ark** *cearc*	(ii) **k'ark ri:** *cearc fhraoigh*
	Pl. (i) **k'arki:**	(ii) **k'arkə fri:**

This same principle applies to the plural of many nouns belonging to other classes also, e.g. **aŋ'əl** *aingeal*, pl. **aŋl'i:/ə** ; **bra:hir'** *bráthair*, pl. **bra:r'hi:/ə** ; **kapəʟ** *capall*, pl. **kapl'i:/ə** ;

[1] These correspond to the form *fineda* given as one form of the nom. and acc. pl. in IGT ii ; see Celtica III, p. 89.

klag'ən *claigeann*, pl. **klagn'i:/ə** ; **krak'ən** *craiceann*, pl. **krakn'i:/ə** ; **dorəs** *dorus*, pl. **dorʃi:/ə** ; **din'ə** *duine*, pl. **di:n'i:/ə** ; **f'iəkil'** *fiacail*, pl. **f'iəkli:/ə** ; **uŋə** *ionga*, pl. **iŋn'i:/ə**.

530. Other plural suffixes are **-əxə**, **-ənə**, **-tə**, **-t'ə**, **-hə**, and combinations of these. These are the allegro forms, used in conjunction with an epithet or defining genitive. Otherwise they are replaced by the corresponding strong forms **-əxi:**, **-əni:**, **-ti:**, **-t'i:**, **-hi:**, respectively.

Examples of the different plural suffixes, showing first the strong forms in **-i:**, followed by the corresponding allegro forms in brackets:

(i) **-əxi:** (**-əxə**)

531. In regard to the formation of plurals, the dialect is obviously in a state of transition with consequent instability. Different speakers actually use different plural forms, each to some extent improvising. The same speaker in some cases uses indifferently two distinct forms.

The Genitive Plural

532. In the case of many of the nouns in Classes I and II, the gen. pl. coincides in form with the nom. sg.

Examples—**a:l banu:** *ál banbh,* **u:dər nə mr'e:g** *ughdar na mbréag,* **loxd nə gab** *lucht na gcab,* **kr'ahnəx ruə nə glox** *creathnach ruadh na gcloch,* **krap mo:r klox,** *cnap mór cloch,* **po:r nə gapo:g** *pór na gcapóg,* **ri: nə gor** *rí na gcorr,* **əg' iəri: gl'uməx** *ag iarraidh gliomach,* **ə maru: nə maləx** *ag marbhadh na mballach,* **f'e:həxi: mart** *féitheacha mart,* **bariL'ə sguda:n** *baraille sgadán,* **p'aku: nə ʃinʃər** *peacadh na sinnsear.*

su:l' *súil* has non-palatal *l* in the gen. pl., e.g. **klox nə su:l** *cloch na súl* ; likewise *cnáimh,* gpl. *cnámh,* e.g. **t'in'ə xrã:w.**

533. The gen. pl. of most nouns which add a plural suffix either coincides with or is related in form to the nom. pl. When the nom. pl. ends in **-əni:** or **-əxi:,** the gen. pl. frequently drops the final **-i:** and thus ends in a non-palatal consonant, e.g. **ʃi:l nə wragən** *síol na bhfrogann,* **ə br'e nə niv'əx** *ag breith na n-uibheach,* **ə giḍ ʃo:Ltəx** *a gcuid seóltach.*

534. Gen. pl. forms hold the field in placenames, are found in stereotyped phrases, and occur following numeral and other collectives which have their completion in the partitive genitive ; otherwise nom. pl. forms tend to oust them, e.g. **ə bl'a:n nə mah** *ag bleaghan na mba.*

The Dual

535. The dual is still vigorous in the dialect. In the nom. and dat. it usually coincides in form with the dat. sg., e.g. **ɣa: xluəʃ** *dhá chluais,* **ən da: xoʃ** *an dá chois,* **ən da: lã:v'** *an dá láimh,* **ənə ɣa: garik'** *i n-a dhá gcarraig,* **ənə ɣa: goʃ** *i n-ar dhá gcois.* The form **ɣa: dr'iən** *dhá dtrian* is still current. The gen. of the dual usually has the form of the gen. pl., e.g. **gr'im' ɣa: xos er'** *greim dhá chos air.*

Declension of Adjectives

536. A distinction must be made between the free living forms of the adjective, bent to the uses of everyday speech, and petrified forms found in received ready-made expressions, placenames, and the language of traditional lore. It is not easy, however, to segregate the two types. When a singular noun is qualified by an adjective, the nom. form of both is commonly used for

the dat. It is quite normal and regular to say **er' ə mrĩ:** *ar an mnaoi* (where no adj. follows), but **er' ə m'an ɣuf** *ar an mbean dhubh.* Yet cf. **gə wrĩ: wer'ib'ə** *do mhnaoi bhoirb,* occurring in a proverb, t. 149.

537. Initial mutation in adjectives of all categories is felt to be morphemically of more importance than final inflexion. Monosyllabic adjectives ending in a consonant, and of frequent occurrence, are best able to maintain their inflexions. Such are **mo:r** *mór,* **ba:n** *bán,* **boxd** *bocht,* **o:g** *óg,* **glas** *glas,* **ki:l** *caol,* **g'e:r** *géar,* **glan** *glan.* These follow the same declensional pattern, thus :

mo:r *mór*

	sg.		pl.
	masc.	fem.	
n.	**mo:r**	**wõ:r**	**mo:rə** (**wõ:rə** following a pal. consonant)
d.	**wõ:r**	**wõ:r/wõ:r'**	
g.	**wõ:r'**	**mo:r'ə**	**mo:rə/mo:r**
v.	**wõ:r'**	**wõ:r**	

538. In the gs. flexion of **d'as** *deas* there is the vowel change **a** > **e** in the stem : masc. **jeʃ,** fem. **d'eʃə** ; while in the gs. of **duf** *dubh* and **trum** *trom* the change is **u** > **i** : masc. **ɣif'** and **hrim',** fem. **div'ə** and **trim'ə,** respectively.

539. For **maç** *maith* the gs. forms are : masc. **wãç,** fem. **maçə** ; the form for the ndp. is **maçə,** which is commonly used for the gp. also.

540. For disyllabic and trisyllabic adjectives it is not so easy to give a clear picture of actual usage. **uəsəl** *uasal* has gs. masc. **uəsil',** fem. **uəʃL'ə** ; vs. masc. **uəsil',** fem. **uəsəl.** For all cases of the pl. **uəʃL'ə** is used.

541. Adjectives ending in **-əx** *-(e)ach* such as **saləx** *salach,* **d'i:r'əx** *díreach,* etc., are practically flexionless, when they occur as free forms. For the gs. of both genders, and for the ds. fem., **-i:** turns up only as a petrified form, e.g. **marə'fa:ʃg' er' ə gaL'i: vr'e:gi:** *marbh-fáisg ar an gcailligh bhréagaigh.* **-ə** *-a* is not normally added to form the pl. of adjectives ending in **-əx.** Anyhow, following the unvoiced consonant **x,** final **-ə** would be liable to elison in terminal position as a waning vowel (§ 242).

542. As for adjectives ending in **-u:l'**, **-wil'**, e.g. **do:ju:l'** *dóigheamhail*, **a:wil'** *águmhail*, and those ending in **-u:r**, **-wər**, e.g. **gr'anu:r** *greannmhar*, **br'i:wər** *bríoghmhar*, the examples collected are not sufficient to warrant a final conclusion. The following have been observed: gs. fem. **ma:hər nə məid'in'ə glo:ru:r** *máthair na Maighdine Glórmhar* (Sb), **di:n'ə do:ju:lə** *daoine dóigheamhla*.

543. Adjectives ending in a vowel, as for example **br'a:** *breaghdha*, **b'o:** *beó*, **bi:** *buidhe*, **kr'ãsd(ə)** *cneasta*, **gra:nə** *gránna*, **gə'la:nt(ə)** *galánta*, **fadə** *fada*, **tanhi:** *tanaidhe*, **kro:gənt(ə)** *cródha*, **d'iəgənt(ə)** *diadha*, are indeclinable.

544. For examples of adjectives inflected in the pl., and in the dual number, see § 487 (iii) and (iv) respectively.

Comparatives

545. The comparative has always a clearly distinctive form. For most monosyllabic adjectives ending in a consonant the opposition is -C, -C'ə.

Examples—

positive		comparative
kam	*cam*	**kam'ə**
ki:l	*caol*	**ki:l'ə**
d'e:n	*dian*	**d'e:n'ə**
g'e:r	*géar*	**g'e:r'ə**
glan	*glan*	**glan'ə**
o:g	*óg*	**o:g'ə**

The opposition is zero, C'ə, in **luə** *luath*, compar. **luəçə**.

546. In the case of certain adjectives there is vowel change in the stem, as follows:

	positive		comparative
u > i	**duw/duf**	*dubh*	**div'ə**
	lum	*lom*	**lim'ə**
	trum	*trom*	**trim'ə**
o > i	**mox**	*moch*	**miçə**
e > i	**b'eg**	*beag*	**b'ig'ə**
a > e	**d'as**	*deas*	**d'eʃə**
a > i	**ʃan**	*sean*	**ʃin'ə**

547. In certain disyllabic adjectives there is alternation of the stem vowel together with palatalization of the medial consonant, e.g. **d'arəg** *dearg*, compar. **d'ir'ig'ə** ; **gorəm** *gorm*, compar. **ger'im'ə**.

548. There is syncope in certain disyllables, e.g. **uəsəl,** *uasal*, compar. **uəʃl'ə** ; **i:ʃəl** *íseal*, compar. **i:ʃl'ə** ; **la:d'ir'** *láidir*, compar. **la:dr'ə** ; **l'ahən** *leathan*, compar. **l'ihn'ə** ; **sev'ir'** *saidhbhir*, compar. **sevr'ə** ; together with metathesis in **d'i:l'iʃ** *dílis*, compar. **d'i:ʃl'ə**.

549. Adjectives ending in **-əx** *-(e)ach* substitute **-i:** *-(a)ighe* to form their comparatives, e.g. **suərəx** *suarach*, compar. **suəri:** ; **bro:x** *brodhach*, compar. **bro:i:**, also **bro:jə**.

550. Comparative forms ending in **-xd'ə** (evidently formed on the analogy of compar. **boxd'ə** *boichte*) are established for **br'a:** *breaghdha*, compar. **br'a:xd'ə** ; **re:j** *réidh*, compar. **re:xd'ə** ; **t'eh** *te*, compar. **t'o:xd'ə**.

551. The following are irregular:

positive		comparative
a:rd	*ard*	**ord'ə**
dunə	*dona*	**dunə**
gar	*gar*	**ger'ə**
g'a:r	*gearr*	**g'urə**
fadə	*fada*	**fid'ə**
furəsdə	*furasta*	**fusə/fisə**
maç	*maith*	**f'a:r**
mo:r	*mór*	**mu:**
olk	*olc*	**m'asə**

552. In counting the forms used are:

1	**hi:n**	8	**hoxd**
2	**do:**	9	**ni:**
3	**tr'i:**	10	**d'eç**
4	**k'ahir'**	11	**hi:n' e:g**
5	**ku:g'**	12	**do: je:g**
6	**ʃe:**	13	**tr'i: d'e:g**
7	**ʃaxd**	20	**f'iç(ə)**

553. The forms employed before nouns are as follows:

(with **k'ʌn** *ceann*)					
	1	**e:n' çʌn (ə'wa:n')**	8	**hox g'iN'**
	2	**ɣa: çʌn**	9	**ni: g'iN'**
	3	**tr'i: k'iN'**	10	**d'e g'iN'**
	4	**k'er'ə k'iN'**	11	**e:n' çʌN' d'e:g**
	5	**ku:g' k'iN'**	12	**ɣa: çʌN' d'e:g**
	6	**ʃe: k'iN'**	13	**tr'i: k'iN' d'e:g**
	7	**ʃax g'iN'**	20	**f'içə k'ʌn**

554. In the case of a large number of nouns either the sg. or the pl. form may be used after any one of the numbers 3—10 inclusive. When the sg. form is used following 3, 4, 5, or 6, the initial is subject to lenition, e.g. **nə tr'i: wĭr'ə** *na trí Mhuire*, **k'er'ə v'i:l'ə** *ceithre mhíle*, **ku:g' wil'i:n'** *cúig bhuilín*, **ʃe: funtə** *sé phunta*.

555. When the pl. form of a noun follows 3, 4, 5, or 6, the initial consonant is unlenited, e.g. **tr'i: kʌl'əxi:** *trí cailleacha*, **k'er'ə bl'iənə** *ceithre bliadhna*, **ku:g' klagn'ə** *cúig claigne*, **ʃe: treçə** *sé troighthe*. If the initial of the pl. noun following is a vowel, **h** is prefixed following 3, 4, and 6, e.g. **tr'i: huər'ə** *trí huaire*, **k'er'ə huən'** *ceithre huain*, **ʃe: hafr'iN'** *sé haifrinn*. **h** following **ku:g'** has the effect of unvoicing the final **g'**, e.g. **ku:k' uər'ə** *cúig huaire*.

556. Each of the numbers 7, 8, 9, and 10, eclipses the initial of a following noun, whether its form be sg. or pl., e.g. **ʃax dreçə** *seacht dtroighthe*, **ox v'arə d'e:g** *ocht bhfeara déag*, **ni: ml'iənə** *naoi mbliadhna*, **d'e dreç əʃ tr'i: f'içid'** *deich dtroigh is trí fichid*.

557. The following examples illustrate the usage with imprecise numbers involving 'or': **ə do: nʌ: tr'i: gə vl'iənti:** *a dó nó trí de bhliadhantaibh*, **ə tr'i: nʌ: k'ahir' gə hak' o:r'** *a trí nó ceathair de shaic óir*, **ə ku: nʌ: ʃe: gə wodəxa:ni:** *a cúig nó sé de bhodachánaibh*, **v'i: ʃe: nʌ: ʃaxd gə çarki: ek'i:** *bhí a sé nó seacht de chearcaibh aice*, **ku:g'ər nʌ: heʃər** *cúigear nó sheisear*.

558. To illustrate the usage with **ə g'uN** *i gcionn* ('at the age of') two examples are to hand: **bo: ə g'uN ə ɣa: bl'iən'** *bó i gcionn a dhá bliadhain*, **kapəl ə g'uN ə tr'i: bl'iənə** *capall i gcionn a trí bliadhna*.

559. The form of the noun used after **kuplə** *cupla*, **k'e:d** *céad*, **f'içə** *fiche*, and **m'i:l'ə** *míle*, is that of the nom. sg., e.g. **kuplə din'ə** *cupla duine*, **k'e:d m'i:l'ə** *céad míle*, **f'içə b'an** *fiche bean*, **m'i:l'ə bl'iən'** *míle bliadhain*.

	sg.		pl.	
1	**m'e:**	*mé*	**mid'/ʃɪn'**	*muid/sinn*
2	**tu:**	*tú*	**ʃiv'**	*sibh*
3m.	**ʃe:**	*sé*	**ʃiəd**	*siad*
f.	**ʃi:**	*sí*		

The corresponding emphatic forms are:

	sg.		pl.	
1	**m'iʃə**	*meise*	**mid'i:/ʃɪn'i:**	*muide/sinne*
2	**tusə/tisə**	*tusa*	**ʃiv'ʃə**	*sibh-se*
3m.	**ʃeʃən**	*seisean*	**ʃiəḍsən**	*siad-san*
f.	**ʃiʃə**	*sise*		

The above are all used in cases where the pronoun is the subject of an active verb.

563. The following special forms are employed when the pronoun is (a) object of an active verb, (b) subject or predicate of the copula, (c) subject of a passive verb, (d) used absolutely:

	Simple		Emphatic		Simple		Emphatic	
2	**hu:**	*thú*	**husə/hisə**	*thusa*				
3m.	**e:**	*é*	**eʃən**	*eisean*	**iəd**	*iad*	**iəḍsən**	*iad-san*
f.	**i:**	*í*	**iʃə**	*ise*				

In the case of the 2nd p. sg., following the copula and the conjunction **agəs/əs** *agus/is*, the form used is **tu:**, not **hu:**.

Demonstratives

564. The basic demonstratives are **ʃəu/ʃo** *seo*, **ʃin'** *sin*, **ʃu:d** *siúd*. These as they stand may be employed as demonstrative pronouns, but usually they combine with the personal pronouns of the 3rd person to give the following:

	as subject	as object
ʃe:	**ʃəu/ʃo**, **ʃin'**, **ʃu:d**	**ʃəu/ʃo**, **ʃin'**, **ʃu:d**
ʃi:	**ʃəu/ʃo**, **ʃin'**, **ʃu:d**	**ʃəu/ʃo**, **ʃin'**, **ʃu:d**
ʃiəḍ	**ʃəu/ʃo**, **ʃin'**, **ʃu:d**	**ʃəu/ʃo**, **ʃin'**, **ʃu:d**
e:		**ʃəu/ʃo**, **ʃin'**, **ʃu:d**
i:		**ʃəu/ʃo**, **ʃin'**, **ʃu:d**
iəḍ		**ʃəu/ʃo**, **ʃin'**, **ʃu:d**

565. Following the parts of the copula **ɴax** (**b**) *nach* (*b*), **b'** *b'*, **gə(r)b'** *gurb*, the forms of the demonstratives are **əu**, **in'**, e.g. **ɴax əu e: də wãk** *nach eo é do mhac?* **ɴax b'in' e: mu dahir'** *nach b'in é amuigh d'athair?* **gə b'in' i: də xapəʟ** *gurb in í do chapall.*

566. Following a noun (defined by the article) the demonstratives are adjectives. The forms are **ʃəu/ʃo**, **ʃin'**, **u:di:** *úd*, e.g. **ən kaṭ ʃəu** *an cat seo*, **ə ʟa: ʃin'** *an lá sin*, **ən' f'ar u:di: ha:ʀ** *an fear úd thall.*

567. The demonstratives, when used to indicate or point out objects (= voici, voilà), have the force of adverbs. The forms then assumed by them are **həu**, **hin'**, and **ʃid/hid**.

Examples—**həu i: ən'iʃ i:** *seo í anois í*, **hin' e: hi:s e:** *sin é thíos é*, **ʃid e:** *siúd é.*

Possessives

568. The possessive adjectives corresponding to the personal pronouns are:

	sg.		pl.	
	preceding consonant,	vowel		
1	**mə** *mo*	**m** *m'*	**ə** *ar* (eclipsing)	
2	**də** *do*	**d d'** *d'*	**ə** *bhar*	,,
3m.	**ə** *a*	- *a*	**ə** *a*	,,
f.	**ə** *a*	**ə h-** *a h-*		

Emphatic forms are obtained by suffixing the emphatic particle to the noun which follows the possessive adjective, thus:

	sg.		pl.	
1	**mə çansə**	*mo cheann-sa*		
2	**də çansə**	*do cheann-sa*		
3m.	**ə çansən**	*a cheann-san*	**ə gansən**	*a gceann-san*
f.	**ə k'ansən**	*a ceann-san*		

Sometimes in order to distinguish more clearly between the emphatic forms of the 3rd p. sg. masc. and the 3rd p. sg. fem., **ʃeʃən** *seisean* and **ʃiʃə** *sise* are employed as emphatic particles following the noun, e.g. **ə çan' ʃeʃən** *a cheann seisean* 'his', **ə k'an' ʃiʃə** *a ceann sise* 'hers'.

569. The usual emphatic forms employed for the 1st and 2nd p. pl. are **sogiɴ'i:** *s(o) againne* and **sogi:ʃ(ə)** *s(o) agaibh-se* respectively, following the noun, which is defined by the article.

Examples—(ə) **wo: sogiɴ'i:** *an bhó s'againne*, **sə t'ax sogi:ʃ** *san teach s'agaibh-se.*

3m.	**hri:d'**	*thríd*	**hri:fə**	*thríotha*
f.	**hri:çə**	*thríthe*		

On the analogy of **hart'i:**, **hartu:**, some speakers in Faulmore say **hri:t'i:**, **hri:tu:**, for the 3rd p. sg. fem. and 3rd p. pl. respectively.

572. The pronominal forms corresponding to **ən** *chun* 'towards' have become merged with those from **eg'** *ag*, but **h** is prefixed in the warning **hugəd** *chugad*, e.g. **hugəd ə pu:k** *chugad an púca*, and in the phrase **ʃo huginˈ** *seo chugainn* 'next' in time. **ən ə** *chun a(n)* and **eg' ə** *ag a(n)* are both used in the sense of 'to the', the former for places, the latter for persons, e.g. **ən ə t'up** *chun an tsiopa*, **eg' ə tagərt** *ag an tsagart*.

573. The emphatic suffix may be attached to all pronominal forms of prepositions, e.g.

	sg.		pl.	
1	**dumsə**	*damh-sa*	**du:ɴ'i:**	*dúinne*
2	**duʈsə**	*duit-se*	**di:v'ʃə**	*daoibh-se*
3m.	**do:sən**	*dó-san*	**do:fəsən**	*dóibh-sean*
f.	**diʃə**[1]	*di-se*		

[1] Thus SOG; it is usually **diçəsən** *duithe-san* in Faulmore.

Chapter XXI

VERBS

Allegro and Pausa Forms

574. Allegro forms are used with a pronoun subject, while pausa forms are found with a noun subject, and also when no subject is expressed, as for instance in a reply to a question, or when the verb is repeated. In the paradigms that follow the plan adopted usually is to give both forms. The allegro form is given first with the pronoun **ʃe:** *sé* (**ʃe:** standing for any pronoun in this case), followed by the full or pausa form. A slant line is inserted between the two forms, thus: **t'ukə ʃe: / t'uki:** *tiocfaidh*, **xa ʃe:/ xaç** *chaith*, **wan'həḍ ʃe:/ wan'hu:** *bhainfeadh*.

Monosyllabic Stems

575. **kaʟ'im'** *caillim*

Pret.: **xaʟ'** with all pronouns. For sg. 1 there is a pausa form **xaʟ'əs**

Pass. **kaʟ'u:**

[1] The secondary tenses are the impf. indic., cond., and past subj.

576. In the 1st p. pl. the pronoun **mid'** *muid* is generally used in the pres. indic., pres. subj., fut., and pret. In these tenses **ʃiɴ'** *sinn* is more rarely employed. In the secondary tenses **ʃiɴ'** rather than **mid'** is in general use. In Dû Chaocháin the desinence **-əmiʃd'** *-(e)amaist* instead of **-əḍ ʃiɴ'** in the 1st p. pl. of the secondary tenses is sometimes to be heard, but in Faulmore **-əmiʃd'** is extremely rare, and seems to be confined to verse, prayers, etc.

Verbs with monosyllabic stem ending in fricative **ç**, **j**, or **w**.

577. Group (i), with stem ending in **ç**, includes **ba:çim'** *báithim*, **briçim'** *bruithim*, **kaçim'** *caithim*, **kraçim'** *craithim*, **do:çim'** *dóighim*, **sa:çim'** *sáithim*, **ʃg'eçim'** *sgeithim*, **sgoçim'** *sgoithim*. Irregular Verbs

583. **b'er'im'** *beirim*

This verb has fut. stem **b'e:r-** *béar-*, which gives fut. sg. 3 **b'e:rhə ʃe:/b'e:rhi:**, and cond. **v'e:rhəḍ ʃe:/v'e:rhu:**

The pret. is **rug**; otherwise the verb is regular.

584. **klin'im'** *cluinim*

Apart from the pret. the only irregularity shown by this verb is in the 2nd p. sg., interrogative, which is **ə gluɴ tu:** *an gcluin tú?*, and the vn., which is **kluns/klins** *clos*. The pret. is **xuələ ʃe:/xuəli:** *chualaidh*.

585. **d'i:nim'/d'e:nim'** *déanaim*

In Faulmore this verb is regular except for its pret., which is **riɴ'ə ʃe:** (also **riɴ' ʃe:**)/**riɴ'i:** *rinne*. The pret. has a special dependent form, e.g. **ə ɴ'a:rɴə ʃe:** *an ndearna sé?* **ɴ'i: ja:rɴi:** *ní dhearna*. In Dû Chaocháin SOG in the impf. used the form **n'i:ḍ ʃe:** *níodh sé*, but this form seemed to be obsolescent in his district.

586. **d'er'im'** *deirim*

Pres. Indic.: sg. 1 **d'er'im'**, 2 **d'er tu:**, 3 **d'er ʃe:** / **d'er'**.

In the rel. and in narrative **ə'd'er ʃe:** *adeir sé* is the form in use. **d'er'əɴ** *deireann* is commonly employed in a frequentative sense. Both **d'er'əɴ** and **abri:ɴ** *abraíonn* are used as dependent forms.

Impf. Indic.: sg. 1 **dabri:ɴ'** *d'abraínn*, 3 **dabri:ḍ ʃe:/dabri:f. d'er'əḍ ʃe:/d'er'u:** is also used, but seems rarer than **dabri:ḍ ʃe:/dabri:f**

Rel. (usually) (ə) **dabro:f**

Pret.: sg. 3 **du:rt'**, which is analysed by speakers as if *d'ubhairt*, e.g. **ɴ'i:r u:rt'** *níor ubhairt*, **gər u:rt'** *gur ubhairt*.

Pass. **hu:ru:** *hubhradh*.

Impv.: sg. 2 **abir'**, pl. 2 **abrig'i:**

587. **fa:m'** *faghaim*

Pres. Indic.: sg. 1 **fa:m'**, 2 **fa:ɴ tu:**, 3 **fa:n' ʃe:/ fa:ɴ**

Rel. **a:ns**

Pass. **fa:t'ər**

Impf. Indic.: sg. 1 **da:ɴ'** *d'fhaghainn*, 3 **da:ḍ ʃe:/ da:f** *d'fhaghadh*.

Fut.: sg. 3 **jofə ʃe:/ jofi:** ; note also **jəufə tu:**, t. 304.

Rel. (ə) **jofəs**

Cond.: sg. 1 **jofiɴ'**, 2 **jofa:**, 3 **jofəḍ ʃe:/ johu:** ; note also **jəufəḍ ʃe:**, t. 241.

Some people in Faulmore[1], not Sb, say **d'ofəḍ ʃe:/ d'ohu:** *d'gheobhfadh*.

Pass. **jofi:**

In the fut. and cond. the dependent forms are formed from the stem **wi:-** *bhfuigh-, fhuigh-*.

Examples:

595. The copula **əs əʃ** *is*

There are only two tenses in the indicative of the copula, viz. (i) the pres.-fut., and (ii) the pret.-cond. Of the pres.-fut. the forms are as set out in the following table:

	Positive	Negative
Absolute:	**əs, əʃ**	**n'i:**
Interrog.:	**ər, ər', ən**	**nax**
Preceding a vowel:	**ər, əN, əN', əb, əb'**	**nax, nax b, b'**
Dependent:	**gər**	**nax**
Preceding a vowel:	**gər, gə(r)b, gəb'**	**nax, nax b, b'**
Relative:	**əs, əʃ, ər**	**nax**
Preceding a vowel:	**əs, əb, əb'**	**nax**

The following are the current forms of the pret.-cond.:

	Positive	Negative
Absolute:	**bə**	**n'i: bə, n'i:r**
Preceding a vowel:	**b, bə j**	**n'i:r w, v'**
Interrog.:	**ər, əmə, əbə**	**na:r, nax mə, nax bə**
Preceding a vowel:	**ər, əb, əb', əm, əm'**	**na:r w, v'; nax m, m'; nax b, b'**
Dependent:	**gər, gə mə, gə bə**	**na:r, nax mə, nax bə**

Preceding a vowel:

	gəm, gəm′, gəb, gəb′, gə mə j	**nа:r w, v′; nax b, bə j**
Relative:	**bə, əmə, ər**	**nа:r, nax mə, nax bə**
Preceding a vowel:	**əb, əb′, əmə j**	**nа:r w, v′**

The pres. subj. expresses the optative mood; the following forms occur:

	Positive	Negative
	gə mə	
Preceding a vowel:	**gə m, gə mə j**	**nа:r w, v′**

Disyllabic Stems

596. Verbs in **-i:** *-(a)igh*, mostly denominatives, constitute a large class showing a strong tendency to extend and annex others. Their conjugation is quite regular.

597. **i:ʃʟ′i:m′** *íslighim*

Pres. Indic.: sg. 3 **i:ʃʟ′i:n**

Rel. **i:ʃʟ′i:(n)s**

Impf. Indic.: sg. 1 **d′i:ʃʟ′i:n′**, 3 **d′i:ʃʟ′i:ḍ ʃe:/ d′i:ʃʟ′i:f**

Fut.: sg. 3 **i:ʃʟ′o: ʃe:/ i:ʃʟ′o:j**. For the 1st p. sg. there is a pausa form **i:ʃʟ′o:d** *ísleóghad*.

Rel. **i:ʃʟ′o:s**

Pass. **i:ʃʟ′o:xi:r**

Cond.: sg. 1 **d′i:ʃʟ′o:n′**, 2 **d′i:ʃʟ′o:xa:**, 3 **d′i:ʃʟ′o:ḍ ʃe:/d′i:ʃʟ′o:f**

Pass. **d′i:ʃʟ′o:xi:**

Pret.: sg. 3 **d′i:ʃʟ′ə ʃe:/d′i:ʃʟ′i:**

Pass. **hi:ʃʟ′i:f**, (neg.) **n′i:r hi:ʃʟ′i:f**

598. The consonant **j** intervenes between the stem vowel and the suffix **-i:** *-igh* in **grõ:ji:n** *gnóaigheann*, **m′a:ji:n** *meadhaigheann*, **br′o:ji:n** *breó(dh)aigheann*.

Fut.: sg. 3 **grõ:jo: ʃe:**, **m′a:jo: ʃe:**

Pass. **m′a:jo:xi:r**

Pret.: sg. 3 **ɣrõ:jə ʃe:**, **v′ã:jə ʃe:**, (rel.) **ə vr′o:jə m′e:** 'which sickened me'.

Pass. **m′a:ji:f**

599. Disyllabic stems ending in **l′**, **n′**, **ɴ′**, **r′**, **ʃ**, (type **fuəgir′** *fuagair*) conform to the conjugation of **-i:** verbs. When in inflexion a syllable is to be added, **-i:** is first suffixed to the syncopated stem, e.g. **fuagr** + **i:** + **əɴ** = **fuegri:ɴ**. Similarly in the fut., **o:** is suffixed to the syncopated stem, thus: **fuəgr** + **o:** + **ij** = **fuəgro:j**. Included in this class are the common verbs **kodil′** *codail*, **kim′il′** *coimil*, **fosgil′** *fosgail*, **ʃaxin′** *seachain*, **fel′iɴ′** *foiling*, **fuəgir′** *fuagair*, **iɴ′iʃ** *innis*.

Examples:

Pres. Indic.: sg. 3 **koʟi:ɴ**, **kiml′i:ɴ**, **fosgli:ɴ**, **ʃaxni:ɴ**, **feln′i:ɴ**, **fuəgri:ɴ**, **inʃi:ɴ**

Fut.: sg. 3 **koʟo: ʃe:/ koʟo:j**, **kiml′o: ʃe:/ kiml′o:j**, etc.

600. The simple stem form without the **-i:** suffix is retained in the 2nd p. sg. of the impv., e.g. **kim′il′**, **fuəgir′**, **iɴ′iʃ** ; and in the pret. 3rd p. sg., e.g. **xim′il′**, **duəgir′**, **d′iɴ′iʃ**. In the case of the last mentioned verb, however, **d′inʃi:** seems more frequent than **d′iɴ′iʃ** for the pret. 3rd p. sg. In the pausa 1st p. sg. of the pret., **-i:** forms are usually employed, e.g. **d′inʃi:s** *d'innsíos*. Likewise in the pass. of the pret. **-i:** forms are regularly used, e.g. **hinʃi:f** (*do*) *hinnsíodh*.

Formation of Verbal Nouns

601. Disyllabic verbal nouns clearly show a tendency to maintain a velar consonant medially in contradistinction to the other parts of the verb which have the corresponding palatal consonant. The following pairs exemplify the contrast:

Verbal Noun		Pret. Passive	
ba:hu:	*báthadh*	**ba:çu:**	*báitheadh*
buəlu:	*bualadh*	**buəl′u:**	*buaileadh*
kahu:	*caitheamh*	**kaçu:**	*caitheadh*
krahu:	*crathadh*	**kraçu:**	*craitheadh*
du:nu:	*dúnadh*	**du:n′u:**	*dúineadh*
fa:sgu:	*fásgadh*	**fa:ʃg′u:**	*fáisgeadh*
ʟosgu:	*losgadh*	**ʟoʃg′u:**	*loisgeadh*
mahu:	*maitheamh*	**maçu:**	*maitheadh*
ruəgu:	*ruagadh*	**ruəg′u:**	*ruaigeadh*
sa:hu:	*sáthadh*	**sa:çu:**	*sáitheadh*

Likewise the following:

Verbal Noun		Pret. Active	
du:səxd	*dúsacht*	**ɣu:ʃi:**	*dhúisigh*
gluəsəxd	*gluasacht*	**ɣluəʃ**	*ghluais*
sgoh	*sgothadh*	**sgoç**	*sgoith*
to:ga:l'	*tógbháil*	**ho:g'**	*thóig*
trosgu:	*trosgadh*	**hreʃg'**	*throisg*

602. It should also be observed that Erris Irish shows some partiality for the endings **-ən** *-an*, **-əxən** *-achan*, in verbal nouns, e.g. **əg ap'əxən** *ag aipeachan*, **br'akən** *breacan* (*an lae*), **kruəxən** *cruadhachan*, **kid'əxən** *cuideachan*, **fa:ɴ'əxən** *fáinneachan* (*an lae*), **glakən** *glacan*, **grõ:xən** *gnóachan*, **ʟ'agən** *leagan*, **ʟ'ig'ən** *léigean*.

INDEX

Reference is to the numbered sections. Numbers followed by n. refer to footnotes to such sections. Preceded by t. they refer to the numbered lines of the texts in Chapter XII ; p. refers to pages.

Occurrences in the texts are usually not indexed if the words occur elsewhere in the book.

Forms given (particularly in Chapters XIX—XXI) in phonetic transcription only, appear in ordinary spelling in the Index.

h, marking lenition of consonants, is disregarded in determining the dictionary order of words.

Verbs will be found under the 1st p. sg., pres. indic. Prepositional pronouns are given under the simple preposition ; 'set' means the full list.

Among others, the following abbreviations are used: cjn. = conjugation, ib. = same place, n. loc. = placename, n. pr. = proper name, phr. = phrase, vn. = verbal noun.

ADDENDA

xii. In lines 19 and 20 for 'Inishkea' read 'Inishkea North'.

Paragraphs

110, l. 5. Voiceless plosives are aspirated also in medial position.

247. The following examples of what Grammont terms 'l'hapaxépie' (*Traité*, p. 336) occur in the speech of Sb: **faN də hasu:** *fan in do sheasamh*, **ə m'i:n mud do:rtu: fati: aN** (*soitheach*) *a mbíonn muid ag dórtadh fataí ann*, **er ʃən** *ar seisean*.

262, ll. 3-4. Regarding the 'relative importance of a word in a sentence' see Professor de Bhaldraithe's review of this work in *Studia Celtica* V, 164, where he makes the observation, well supported by examples, that 'sentence-stress in Irish seems to be completely independent of the importance of a word in the sentence'.

329. An epenthetic vowel, however, has developed, following a diphthong in the name *Diarmaid* **d'iərəmid'**.

409. *faitcheas* has an alternative pronunciation **fat'e:s** in Faulmore (MMt and others).

467. Add: (vi) *r———r>r———n* in *mairtíreacht* **mart'i:n'əxd.**

527. In Faulmore some other nouns (besides those ending in *-e*) have **-u:** as plur. ending, e.g. **kal'i:n'u:**, sometimes heard as the plur. of *cailín*, and **kel'u:** as plur. of *coileach*.

530 (vii). In Faulmore **bl'iəni:** as plur. of *bliadhain* is commonly heard in such phrases as **ə tr'i: nə: k'ahir' gə vl'iəni:** *a trí nó ceathair de bhliadhnaibh. tonn* has also the more frequently used plur. form **tuNtrəxi:.**

543. **garu:** *garbh* and **maru:** *marbh* have as plur. forms **garəwə** and **marəwə.**

563. In weakly stressed positions the pronoun *é* is often pronounced **a·** (half-long front variety of **a**) by MMt and others in Faulmore, e.g. **əs b'eg a:ns a·** *is beag a fhaghanns é*. However, I have never observed this pronunciation [**a·**] in the speech of Sb.

571. Under *idir*: *eadrainn*, *eadraibh*, are also pronounced **adriN'**, **adri:** respectively. Under *lé*: For **l'it** *liot* as a variant of *leat*, often used in a weakly stressed position, see t. 883.

583. The pret. *rug* means 'gave birth to'. **v'er'** *bheir* is the usual pret. form in the sense (i) 'laid', e.g. **v'er ʃi: uf** *bheir sí ogh*; (ii) 'caught hold (of)', e.g. **v'er ʃi: er'** *bheir sí air*.
